

THIN BEAM

Full LED Headlight

DESCRIPTION

Thin Beam is a powerful full LED headlight specially designed to fit in the front bumper of a race car. The narrow and elongated shape makes Thin Beam perfectly suitable for applications where the space for additional headlights is very tight.

Thin Beam is available with different lens angles and it can be used as spot, middle or corner light. Thin Beam works in combination with the Next Solution LED Feeder, high efficiency current controlled power supplier.

FEATURES

- Narrow and Elongated design
- Rugged aluminium body
- Active cooling
- High Luminous Output up to 3025 Lumen
- 24 Watt or 33 Watt power available
